GITHUB - **LINKEDIN**

CAIRO, EGYPT

OBJECTIVE

I am a full stack developer, I have experience in **.NetCore** and **Django** as a backend and **React.Js** as a frontend, I started to learn in **Django** more than 3 years ago ,less than 1 year **.NetCore MVC & WebApi** and more than 1 year in **React.js**, I built some small apps with all of them you can find in my github account, I have some experience in applied machine-learning and integrating **AI models** with **Django** backend too

SKILLS & ABILITIES

C#	.NetCore MVC	.Net WebApi	EFCore
Linq	SignalR	Sql Server	JWT Authentication
Python	Django	ORM	Django RestFramework
React.js	Redux & ReduxToolkit	React Router Dom	Beautiful soup

EXPERIENCE

- **RENTOLA**   **(OCT 2021 - FEB 2022)**
  - build and modify scrapy spider to scrape data of rental apartments and houses and make some processing and modifications on it to store it on database

PROJECTS

- School Management System (github)   (.NetCore MVC)
  - Allows Teacher and students to share content about subjects under control of admin, who can create Classrooms, Levels, manage registerations, assign students to classrooms and subjects will be added automatically to all students in and can add Teachers to subject of classroom based on teacher's specialty and that allows teacher to add lectures and new content on this subject

- Jobs Gate (github)   In Development   (.Net Web Api)
  - Make easy way to find jobs and apply them with your CV, Employers can publish jobs and receive employees applications build Authentications with Microsoft Identity and JWT Bearer

- Rojetta **(github)**   (Django)
  - enables users to find best doctors Based on doctor's specialty, users also can book with doctors, Doctors can manage their clinics and make time table to each clinic and this appears to users when they apply

- E-Commerce **(github)** In Development   (Django + React.Js)
  - This website I built with Django and React.js, I made categories for products and each product belongs to a shop, can add comments and rate the product in details page and see product available colors and more

- Chat Application **(github)**   (Express.Js)
  - This app I am building with express.js and socket.io to make notifications and messages of each user come directly to him without refreshing the page with simple design

EDUCATION

- Computer & Information Helwan university (Oct 2021 - Feb 2022)
  - **CS - IS**

Helwan university

LANGAUGES

- Arabic
- English
